the application of mathematical analysis to wireless networks has met with limited success due to the complexity of mobility and traffic models coupled with the dynamic topology and the

unpredictability of link quality that characterize such networks the ability to model individual independent decision makers whose actions potentially affect all other decision makers makes game theory particularly attractive to analyze the performance of ad hoc networks game theory is a field of applied mathematics that describes and analyzes interactive decision situations it consists of a set of analytical tools that predict the outcome of complex interactions among rational entities where rationality demands a strict adherence to a strategy based on perceived or measured results in the early to mid 1990 s game theory was applied to networking problems including flow control congestion control routing and pricing of internet services more recently there has been growing interest in adopting game theoretic methods to model today s leading communications and networking issues including power control and resource sharing in wireless and peer to peer networks this work presents fundamental results in game theory and their application to wireless communications and networking we discuss normal form repeated and markov games with examples selected from the literature we also describe ways in which learning can be modeled in game theory with direct applications to the emerging field of cognitive radio finally we discuss challenges and limitations in the application of game theory to the analysis of wireless systems we do not assume familiarity with game theory we introduce major game theoretic models and discuss applications of game theory including medium access routing energy efficient protocols and others we seek to provide the reader with a foundational understanding of the current research on game theory applied to wireless communications and networking

the award winning the new palgrave dictionary of economics 2nd edition is now available as a dynamic online resource consisting of over 1 900 articles written by leading figures in the field including nobel prize winners this is the definitive scholarly reference work for a new generation of economists regularly updated this product is a subscription based product
