The ancient vedic system provides a predictive system that can accurately predict life events and different chapters of life called *dasha*. In vedic astrology, the palm is used as a support and cross reference to the astrological chart. From the palm, the relative strength of the planets in the birth chart can be determined. It also helps in rectifying the horoscope if there is some doubt about the birth time and it provides the astrologer with additional information about personality, life potentials, future trends and events. The timing of life events is calculated with a detailed system of planetary time cycles called *dasha*. There is no equivalent system in western astrology. Vedic astrology provides a greater scope, depth and accuracy for predicting the future given an accurate birth time. The *dasha* system can precisely show when a period of fortune or misfortune will begin and end and provide actual dates of two people with wonderful careers, great relationship potential and wealth indicated in their charts. One may find his niche early in life while the other must experience difficult times to finally achieve prosperity later in life. The vedic system can indicate the timing of such events as well as their extent. It uses the moon's position as the starting point against the background of a *nakshatra* in calculations of the planetary periods within the 120-year potential lifespan. The principles governing vedic astrology have remained unaltered for thousands of years. Vedic astrology acknowledges only nine planets such as sun, moon, mercury, venus, mars, jupiter, saturn and the two nodes of the moon called *rahu* and *ketu*.
